

# CORONADO RESOURCES LTD.

## MANAGEMENT'S DISCUSSION AND ANALYSIS FORM 51-102F1

**FOR THE PERIOD ENDED AUGUST 31, 2013**

The following Management's Discussion and Analysis ("MD&A") is dated October 22, 2013, for the six month period ended August 31, 2013 and should be read in conjunction with the Coronado Resources Ltd. ("Coronado" or the "Company") unaudited condensed consolidated interim financial statements for the six month period ended August 31, 2013 and the audited consolidated financial statements for the year ended February 28, 2013. The Company reports its financial position, results of operations and cash flows in accordance with International Financial Reporting Standards (IFRS). The MD&A supplement does not form part of the unaudited condensed consolidated interim financial statements for the six month period ended August 31, 2013 or the audited financial statements of the Company and the notes thereto for the year ended February 28, 2013. All amounts are expressed in Canadian dollars unless otherwise indicated. In addition, readers are directed herein to discussions under the headings "*Forward-Looking Statements*", "*Critical Accounting Estimates*" and "*Risk Factors*".

Coronado management is responsible for the integrity of the information contained in this report and for the consistency between the MD&A and the financial statements. In the preparation of these statements, estimates are necessary to make a determination of future values for certain assets and liabilities. Management believes that the estimates have been based on careful judgements and have been properly presented. The financial statements have been prepared using policies and procedures established by management and fairly represent Coronado's financial position and results of operations.

The Company was incorporated under the *Business Corporations Act* (British Columbia) and carried on its business as a resource exploration company with a focus on mineral exploration opportunities in North America. However on May 14, 2013, Coronado announced that it had entered into a share purchase agreement whereby it had agreed to purchase all the issued and outstanding shares of a power company ("Share Purchase Agreement"). Completion of this transaction would constitute a change of business for purposes of the TSX Venture Exchange ("TSX-V") Policy 5.2 ("Change of Business") and was subject to review by the TSX-V and other approvals. As of September 27, 2013, Coronado had received all of the required approvals and has fulfilled all the requirements of the Share Purchase Agreement and completed the transaction. Coronado is now predominantly a generator and retailer of power and continues to maintain its mineral resource exploration properties.

Coronado's head office is located in Vancouver, British Columbia, Canada. Coronado's common shares trade on the TSX-V under the symbol "CRD" and on the OTCQX International under the symbol "CRDAF".

### **Significant Events, Transactions and Activities**

In order to better understand Coronado's financial results, it is important to gain an appreciation for the significant events, transactions and activities that have occurred during the period ended August 31, 2013 and to the date of this MD&A.

### **Change of Business**

The Company entered into a Share Purchase Agreement dated May 13, 2013, whereby Coronado had agreed to purchase all of the outstanding shares of Opunake Hydro Limited ("OHL") from TAG Oil Ltd. ("TAG") and

Opunake Hydro Holdings Limited (“OHHL”) in exchange for common shares of Coronado (the “OHL Acquisition”), subject to the terms and conditions of the Share Purchase Agreement.

### ***The Proposed Acquisition***

Under the Share Purchase Agreement, Coronado agreed to issue 13,015,410 common shares to TAG, in exchange for 90% of the issued and outstanding shares of OHL and 1,446,157 common shares to OHHL in exchange for 10% of the issued and outstanding shares of OHL representing an aggregate purchase price of \$5,584,000 based on the volume weighted average price of Coronado’s common shares on the TSX-V for the 20 consecutive trading days ending May 10, 2013.

The completion of the OHL Acquisition was subject to a number of conditions, including:

- a) approval of Coronado’s shareholders at a special meeting of the shareholders that was held on August 29, 2013, to consider the OHL Acquisition, including the approval of a majority of disinterested shareholders, excluding TAG and any of its affiliates;
- b) receipt of all regulatory approvals, including the consent from the Overseas Investment Office of New Zealand and acceptance by the TSX-V;
- c) compliance by the parties to the Share Purchase Agreement with all covenants and agreements in such agreement;
- d) no material adverse effect with respect to OHL; and
- e) other conditions precedent set forth in the Share Purchase Agreement.

Coronado received conditional approval from the TSX-V on August 16, 2013 and approval of the shareholders on August 29, 2013 with the Overseas Investment Office of New Zealand giving its approval on September 18, 2013. There had been no material adverse effect on OHL and both parties complied with the terms of the Share Purchase Agreement and the OHL Acquisition was completed on September 27, 2013.

The full text of the Share Purchase Agreement may be found under Coronado’s SEDAR profile at [www.sedar.com](http://www.sedar.com).

### ***Description of Change of Business***

OHL is engaged in generating and retailing power in New Zealand. OHL’s power generation business falls into two categories; (a) hydro generation for which OHL owns the Opunake hydro power scheme, consisting of a 0.4 megawatt (MW) generator located on Lake Opunake in Taranaki, New Zealand, and (b) 2MW of gas fired generators located at TAG’s Cheal A production site in Taranaki, New Zealand, which supplies electricity to TAG’s production station, located at its Cheal oil and gas field site and into New Zealand’s main power grid. In addition, OHL has purchased a 1.15MW containerized gas fired generator which has been installed at the Cheal oil and gas field in August of 2013, which will be generating power in the third quarter, and it intends to acquire and install an additional 1MW gas fired generator in the near term. OHL currently supplies electricity to customers in the Taranaki region of New Zealand including the New Plymouth, Stratford, and Hawera areas, as well as to customers in the Rangitikei and Wellington areas.

OHL had operating revenues of NZ\$2,895,243 for the twelve months ended March 31, 2013 (March 31, 2012 - NZ\$1,007,443) as disclosed in its audited financial statements.

A significant portion of New Zealand electricity is generated from gas fired turbines (2<sup>nd</sup> to hydro in the country) and continues to grow with electricity buyers looking for new supply sources. Coronado intends to pursue this growth opportunity with a properly executed business plan that will allow the Company to increase its electricity generation capacity and customer base in the near term with an initial focus in New Zealand.

Now that the OHL Acquisition is complete, Coronado will be classified as a power production and retail company. At completion, Coronado had approximately \$7.0 million in cash on a consolidated basis.

## **Current Development**

During the quarter ended August 31, 2013, the Company incurred \$119,269 (August 31, 2012: \$231,644) in underground exploration, development and maintenance costs and received \$37,728 (August 31, 2012: \$475,332) in recovery proceeds. For the six month period ended August 31, 2013, the Company incurred \$247,311 (August 31, 2012: \$581,538) on its property and received \$37,728 (August 31, 2012: \$777,550) in recovery proceeds.

There was a small amount of ore shipped in the quarter to Barrick Gold Corporation's ("Barrick") Golden Sunlight Mine which settled in August 2013 for proceeds of \$37,728. This was part of a stockpile of ore that had previously been mined and had been stored on site awaiting availability of a nearby facility capable of processing or milling the material. In August 2013, approximately 2,300 tons of material commenced shipping to a mill in Philipsburg, Montana. The ore has been concentrated and is awaiting shipment to China for smelting and is expected to ship by the end of October 2013 at which time we will receive a partial payment for the concentrate. There is approximately 1,000 tons of ore remaining on site which we will schedule for milling as soon as a facility in the vicinity becomes available. Batch and metallurgical testing continues to establish optimum recovery values of the concentrate.

On May 13, 2013, the Company entered into a Share Purchase Agreement to purchase 100% of the outstanding shares of OHL. This served to significantly alter the business of Coronado to make power generation and sales its primary business which required an application to the TSX-V for a Change of Business. The OHL Acquisition was subject to shareholder and regulatory approvals that have been obtained, and on September 27, 2013, Coronado completed the OHL Acquisition.

On July 16, 2013, the Company approved an Advance Notice Policy (the "Policy") to provide shareholders, directors and management with a clear framework for nominating directors of the company. The Policy will allow for the following:

- i) facilitate an orderly and efficient process for the election of directors at annual general and special purpose meetings;
- ii) ensure that all shareholders receive adequate notice of the director nominations and sufficient information with respect to all director nominees; and
- iii) allow shareholders to register an informed vote after having been afforded reasonable time for appropriate deliberation.

The full text of the Policy may be found under Coronado's SEDAR profile at [www.sedar.com](http://www.sedar.com).

## **Madison Gold Property – History**

In April 2005, the Company entered into an agreement to acquire a 100% interest in seven patented and twelve unpatented claims in a gold-copper property in Montana, subject only to 2% net smelter return or US\$50,000 annual payment. The agreement called for option payments totaling US\$300,000 and the issuance of shares and work commitments. All option payments, share issuances and work commitments have been made and completed.

During the third quarter of fiscal 2013, the mining crew was laid off and the mine was put on maintenance. Since that time, the Company continues to develop its strategy and plans for its mining property.

## FINANCIAL RESULTS OF OPERATIONS

### Summary of Quarterly Results

	<u>August 31, 2013</u>	<u>For Quarters Ended</u>		<u>November 30, 2012</u>
		<u>May 31, 2013</u>	<u>February 28, 2013</u>	
Loss for the period	\$ 329,324	\$ 152,571	\$ 80,291	\$ 26,779
Loss per share	\$ 0.00	\$ 0.00	\$ 0.01	\$ 0.00

  

	<u>August 31, 2012</u>	<u>For Quarters Ended</u>		<u>November 30, 2011</u>
		<u>May 31, 2012</u>	<u>February 29, 2012</u>	
Loss for the period	\$ 141,794	\$ 76,029	\$ 293,303	\$ 134,856
Loss per share	\$ 0.01	\$ 0.01	\$ 0.02	\$ 0.01

### Results for the Quarter

The Company's operations for the three months ended August 31, 2013, produced a net loss of \$329,324 (six months: \$481,895) compared to a loss of \$141,794 (six months: \$217,823) for the same quarter in the previous year. The overall loss for the quarter increased by \$187,530 due to legal and transfer and filing fees related to the OHL Acquisition, which increased by \$112,697 and \$106,312 respectively when compared to the same period in the previous year. Additionally, there were increases in consulting fees of \$34,464 for services rendered to aid the Company in planning and integrating the two businesses. Director fees, insurance, telephone and travel experienced minor increases. The balance of the expense accounts had net reductions of \$34,219 due to less activity while the OHL Acquisition was being completed.

For the three month period ended August 31, 2013, the Company received \$37,728 (six months: \$37,728) in mineral processing recovery proceeds and had expenditures of \$119,269 (six months: \$247,311) for all exploration costs. The mineral processing recovery was received for a small shipment made to Golden Sunlight for the balance of ore remaining at the mine site pending scheduling for processing by Barrick. The expenditures were a result of the mine being put on maintenance and a payment of \$53,126 to Contact Mining for milling of ore into concentrate. The ore had previously been mined and was stored above ground while waiting for a mill in the vicinity with the ability to process the ore became available. In August 2013, the Phillipsburg Mill became available and the Company began milling approximately 2,300 tons which was completed in September 2013. The resulting copper\gold\silver concentrate will be shipped at the end of October to China for smelting. As the Company does not own any revenue producing mineral properties, no mining revenues have been recorded to date. Mineral processing recoveries are netted to exploration expenditures when they are received.

The Company's mineral properties are still in the exploration stage and the recoveries are reported as a reduction in expenditures when processed and received.

### Liquidity and Capital Resources

At August 31, 2013, the Company had \$5,837,260 (August 31, 2012: \$6,322,664) in cash and cash equivalents and \$5,719,942 (August 31, 2012: 6,099,761) in working capital. Historically, the Company has raised funds through equity financing and the exercise of options and warrants to fund its operations. At August 31, 2013, the Company had 64,811,524 (66,904,024 fully diluted) common shares issued and outstanding compared to 64,611,524 (67,234,024 fully diluted) at August 31, 2012. During the period ended August 31, 2013, the Company did not issue

any shares or grant any stock options. During the period ended May 31, 2012, the Company executed a consolidation on a 1 for 2 basis and did not grant any stock options.

The market price of natural resources is highly speculative and volatile. Instability in prices may affect the interest in resource properties and the development of and production from such properties. This may affect the Company's ability to raise capital to acquire and explore resource properties. Management believes it will be able to raise the capital required to develop resource properties by various means of equity issuances, debenture financing or securing joint venture partners for projects.

### ***Related Party Transactions***

The aggregate value of transactions and outstanding balances relating to key management personnel were as follows:

	August 31, 2013	August 31, 2012
Consulting fees	\$ 18,000	\$ 17,000
Consulting and engineering fees	-	5,000
	\$ 18,000	\$ 22,000

All transactions and balances are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

### ***Share capital***

The Company's outstanding share position as at October 22, 2013, is 79,273,091 common shares, and the following shares purchase warrants and incentive stock options are currently outstanding:

	Number of Options	Exercise Price	Expiry Date
Stock Options	92,500	0.30	June 7, 2014
	92,500	0.30	

### ***Subsequent Events***

#### **a.) Change of Business**

Pursuant to the terms of the Share Purchase Agreement, the Company agreed to buy 100% of the 2,100,000 outstanding common share of OHL in exchange for 14,461,567 common shares of the Company. TAG held 1,890,000 shares (90%) and OHHL held 210,000 shares (10%) of OHL. The OHL Acquisition was subject to shareholder and regulatory body approval and met all the requirements and was completed on September 27, 2013.

The following table reflects the share capital before and after the OHL Acquisition:

	Prior to Transaction	%	Subsequent to Transaction	%
The Company's issued and outstanding common shares	64,811,524	100.00	79,273,091	100.00
TAG's interest in the Company	25,975,000	40.08	38,990,410	49.18
OHHL's interest in the Company	-	-	1,446,157	1.82

## **b.) TSX-V Tier Upgrade**

On October 1, 2013, the Company's classification on the TSX-V was upgraded from Tier 2 to Tier 1 status.

### ***Capital Management***

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support future business opportunities. The Company defines its capital as shareholders' equity and loans and advances payable. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

### ***Competition***

The power generation and retail industry in which the Company is primarily engaged is in general, highly competitive, as well as the resource industry in which the Company is still engaged. Competition in generation may come from low fuel cost geothermal generation with peak demand met from hydro storage or batteries. Retail competition could come from other mass market suppliers moving into the electricity market, or the bundling of utility products. Competitors in the resource industry include well-capitalized resource companies, independent resource companies and other companies having financial and other resources far greater than those of the Company, thus a degree of competition exists between those engaged in the resource industry to acquire attractive resource properties.

### ***Critical Accounting Estimates***

The preparation of financial statements requires the Company to select from possible alternative accounting principles, and to make estimates and assumptions that determine the reported amounts of assets and liabilities at the balance sheet date and reported costs and expenditures during the reporting period. Estimates and assumptions may be revised as new information is obtained, and are subject to change. The Company's accounting policies and estimates used in preparation of the financial statements are consistent with those set forth in note 2 of the condensed consolidated interim financial statements for the period ended August 31, 2013. They are considered appropriate in the circumstances, but are subject to judgments and uncertainties inherent in the financial reporting process.

### ***Risks***

Mineral exploration and development involve a high degree of risk and few properties are ultimately developed into producing mines. There is no assurance that Coronado will be able to secure the funds necessary to continue to explore its mineral properties, or, even if the funds are available, will continue with the exploration of its mineral properties. There is also no assurance that any of Coronado's future exploration and development activities will result in any discoveries of commercial bodies of ore. Whether an ore body will be commercially viable depends on a number of factors including the particular attributes of the deposit such as size, grade and proximity to infrastructure, as well as particular attributes of the deposit such as size, grade and proximity to infrastructure, as well as mineral prices and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in a mineral deposit being unprofitable.

Following the completion of the OHL Acquisition, Coronado changed the focus of its business from a junior mining company to an energy generation and retailing company in New Zealand. Some of the additional risks that will be faced by Coronado are, among other things: the possible failure of Coronado to successfully integrate Coronado and OHL and manage the related expansion risks and to realize the anticipated benefits of the OHL Acquisition; the ability to obtain necessary financing and resources for the operation, development and/or expansion of Coronado's energy generation and retailing business and mining operations; the health of the economy generally; current and

future stock price volatility; electricity demand and global market factors and fluctuations in energy and input prices and market conditions; operation risks such as overcapacity risk, disruptions in production, equipment failure, supply failure, changes in hydrology, opposition to production, unexpected increases in raw materials costs; reliance on licences, permits, approvals and renewals from governmental authorities and the risks associated with the complexity of, and any changes to, the regulatory environment or delays in obtaining or failures to obtain necessary regulatory permits and approvals from government authorities; political instability and arbitrary changes in law; changes in the cost of doing business as a result of any changes in the regulatory environment; dependence upon key contracts with certain counterparties and reliance on certain wholesale supply agreements; management inexperience and dependence upon key management employees; fluctuations in foreign currency exchange rates; volumetric and hedging risks; property title and investments related risks, including the potential for the existence of undetected or unregistered interests or claims over the property of Coronado; possible changes in business prospects and opportunities; transportation and construction delays; failure of plant, equipment or processes to operate as anticipated; accidents, environmental risks, labour disputes and other risks of the energy and mining industries; and availability of and access to interconnection facilities and transmission systems. The factors identified above are not intended to represent a complete list of the risks faced by Coronado. While management of Coronado believes that the foregoing risks and uncertainties are a fair indication of the risks and uncertainties material to Coronado's business; however, additional risks and uncertainties, including those currently unknown to Coronado or not considered to be material by Coronado, may also adversely affect the business of Coronado.

### ***Off- Balance Sheet Arrangements***

The Company has not entered into any off-balance sheet transactions.

### ***Financial Instruments***

The Company's financial instruments consist of short-term investments; cheques issued in excess of funds on deposit, accounts payable and accrued liabilities. Terms of the financial instruments, where relevant, are fully disclosed in the Company's financial statements. It is management's opinion that the Company is not exposed to significant currency, or credit risks but is exposed to interest rate cash flow risk arising from its financial instruments and that their fair values approximate their carrying values unless otherwise noted.

### ***Additional Information***

Additional information relating to the Company and results of its operations may be found under Coronado's SEDAR profile at [www.sedar.com](http://www.sedar.com) or on Coronado's website at [www.coronadoresourcesltd.com](http://www.coronadoresourcesltd.com).

### ***Forward-Looking Statements***

The foregoing information contains forward-looking statements within the meaning of securities laws. Forward-looking statements are statements that are not historical fact and often, but not always, forward-looking information can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "estimates", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases, or states that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. Forward-looking information by its nature requires assumptions and involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Coronado to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information.

Forward-looking statements in this MD&A include, but are not limited to the use of proceeds from the private placement, the completion of, and operations of Coronado upon completion of, the OHL Acquisition, and Coronado's overall strategic plan including statements pertaining to the Company's proposed business plans that include the operation and development of its power generation and retail business and the operation of its mining properties for the near and mid-term range. In making the forward-looking statements in this MD&A, Coronado has applied certain factors and assumptions that are based on information currently available to Coronado as well as

Coronado's current beliefs and assumptions made by Coronado, including that Coronado will maintain its current operations, and that a business plan for the near and mid-term range can be fulfilled. Although Coronado considers these beliefs and assumptions to be reasonable based on information currently available to it, they may prove to be incorrect, and the forward-looking statements in this release are subject to numerous risks, uncertainties and other factors that may cause future results to differ materially from those expressed or implied in such forward-looking statements. Such risk factors include, among others, that Coronado's operations will not continue at their current levels, and that Coronado will be unable to fulfill or will experience delays in fulfilling a strategic plan for the near and mid-term range. Additional risk factors are noted under the heading "*Risks*". The factors identified above and in the "*Risks*" section of this MD&A are not intended to represent a complete list of the factors that could affect Coronado. Although Coronado has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended.

There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. Coronado does not undertake to update any forward-looking information, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **1. NATURE OF OPERATIONS AND GOING CONCERN**

The Company is an exploration stage company incorporated under the *Business Corporations Act* (British Columbia) and is engaged in the exploration and development of exploration and evaluation assets. The Company trades on the TSX Venture Exchange under the symbol "CRD" and on the OTCQX International under the symbol CRDAF. On September 27, 2013, the Company announced that it has completed its change of business acquisition previously announced on May 14, 2013. Pursuant to the acquisition, Coronado acquired all of the outstanding common shares of Opunake Hydro Limited ("OHL") from TAG Oil Ltd. ("TAG") and Opunake Hydro Holdings Limited ("OHHL") in exchange for the issuance of 13,015,410 common shares of Coronado to TAG and 1,446,157 Coronado shares to OHHL. As a result of the acquisition, TAG now owns 49.18% and TAG and OHHL, collectively, own 51.01% of the issued capital of Coronado. The Company has now completed the transaction which results in a change in business from an exploration mining company to being predominately an electrical generation and sales company.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

At August 31, 2013, the Company has working capital of \$5,719,942 (February 28, 2013 - \$6,354,138). At August 31, 2013, the Company also has an accumulated deficit of \$6,831,350 (February 28, 2013 - \$6,349,455). The Company has working capital to fund its operations for the next twelve months, but may be reliant upon future equity financing to advance its projects to a feasibility stage of development.

The business of electrical generation and sales, as well as mining exploration involves a high degree of risk and there is no assurance that current electrical generation and sales, and exploration projects will result in future profitable operations. The change in business will add electrical generation and sales to industrial and retail customers to the mining exploration business. The business will no longer only be as speculative as strictly mining exploration but will be subject to risk, market conditions, supply and demand, and competition. There will still be no guarantee that future operations will be profitable. The Company has significant cash requirements to meet its administrative overhead, pay its debts and liabilities, and maintain its exploration and evaluation assets. The recoverability of amounts shown for exploration and evaluation assets is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of exploration and evaluation assets. The carrying value of the Company's exploration and evaluation assets reflects historical costs incurred and is not intended to reflect current or future values.

These condensed consolidated interim financial statements do not include any adjustments to the amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES**

#### **(a) Basis of Consolidation**

The condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned integrated subsidiaries, Coronado Resources USA LLC, Lynx Oil (New Zealand) Limited and Lynx Power Corp. All significant intercompany balances and transactions have been eliminated upon consolidation.

#### **(b) Cash and cash equivalents**

Cash and cash equivalents are comprised of cash on hand, deposits in banks and highly liquid investments having terms to maturity of 90 days or less when acquired.

#### **(c) Basis of Presentation**

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements have been prepared on a historical cost basis and have been prepared using the accrual basis of accounting, except for cash flow information. The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of the policies and reported amounts of assets and liabilities, revenue and expenses. Actual results may differ from these estimates. The preparation of these condensed consolidated interim financial statements used the same accounting policies and methods as in the most recent annual consolidated financial statements. The accounting policies set out below have been applied consistently to all periods presented in these condensed consolidated interim financial statements.

#### **(d) Significant accounting judgments, estimates and assumptions**

The preparation of the Company's condensed consolidated interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed consolidated interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies:

The following are critical judgments that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in the condensed consolidated financial statements:

- the determination that the Company will continue as a going concern for the next year; and
- the determination that there have been no events or changes in circumstances that indicate the carrying amount of exploration and evaluation assets may not be recoverable.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

#### **(e) Property and equipment**

All depreciable property and equipment is recorded at cost and amortized using a declining-balance method at a rate of 20% annually. Additions during the period are amortized at one-half the annual rate. Amortization of exploration-related assets is included within deferred exploration and evaluation assets.

#### **(f) Share capital**

The Company records proceeds from share issuances net of issue costs and any tax effects. Common shares issued for consideration other than cash are valued based on their market value at the date the agreement to issue shares was concluded.

#### **(g) Exploration and evaluation assets**

The Company capitalizes all costs related to investments in exploration and evaluation assets on a property-by-property basis. Such costs include exploration and evaluation asset acquisition costs and exploration and development expenditures, net of cost recoveries from incidental revenues. Incidental revenues are recognized when the product has been delivered to the buyer's plant. Costs are deferred until such time as the extent of mineralization has been determined and exploration and evaluation assets are either developed, the interest is sold or the Company's mineral rights are allowed to lapse.

All capitalized costs are reviewed annually, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property interest exceeds its net recoverable amount (as estimated by quantifiable evidence of an economic geological resource or reserve or by reference to option or joint venture expenditure commitments) or when, in the Company's assessment, it will be unable to sell the property interest for an amount greater than the deferred costs, provision is made for the impairment in value.

When it has been determined that a exploration and evaluation asset can be economically developed as a result of establishing proven and probable reserves, costs incurred prospectively to develop the property are capitalized as incurred and will be amortized using the unit-of-production method over the estimated life of the ore body based upon recoverable ounces to be mined from estimated proven and probable reserves.

The Company is still in the exploration stage and commercial production has not yet commenced. Hence, amortization has not been charged in these financial statements. Commercial production occurs when an asset or property is substantially complete and ready for its intended use. Revenues realized on the sale of ore prior to the commencement of commercial production are offset against the accumulated costs incurred on the property to which they relate, with any excess amounts included in operations.

From time to time the Company may acquire or dispose of an exploration and evaluation asset pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. Proceeds received on the sale or option of the Company's property are recorded as a reduction of the exploration and evaluation asset cost. The Company recognizes in income those costs that are

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

recovered on exploration and evaluation assets when amounts received or receivable are in excess of the carrying amount.

#### **(h) Asset retirement obligation**

The Company recognizes the fair value of liabilities for asset retirement obligations in the period in which a reasonable estimate of such costs can be made. The asset retirement obligation is recorded as a liability with a corresponding increase to the carrying amount of the related long-lived asset. Subsequently, the asset retirement cost is allocated to expenses using a systematic and rational method and is adjusted to reflect period-to-period changes in the liability resulting from the passage of time and revisions to either timing or the amount of the original estimate of the undiscounted cash flow. As at August 31, 2013, the Company did not have any asset retirement obligations.

#### **(i) Basic and diluted loss per share**

Basic loss per share is calculated using the weighted average number of common shares outstanding during the year. The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method the dilutive effect on earnings per share is calculated presuming the exercise of outstanding options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to repurchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options and warrants that would be anti-dilutive.

#### **(j) Share-based compensation**

The Company's stock option plan allows employees and consultants to acquire shares of the Company. Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The fair value of the share-based payment is measured using the Black-Scholes option pricing model. The fair value of the share-based payment is recognized as an expense or capitalized to share capital with a corresponding increase in contributed surplus. Consideration received on the exercise of stock options is recorded as share capital and the related reserves amount is transferred to share capital.

#### **(k) Impairment**

At each financial position reporting date the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is established to be less

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period.

For the purposes of impairment testing, exploration and evaluation assets are allocated to cash-generating units to which the exploration activity relates.

For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs. Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

#### **(l) Foreign currency translation**

The functional and reporting currency of the Company and its subsidiaries is the Canadian dollar. Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities, at the rate of exchange in effect as at the statement of financial position date;
- (ii) Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Income and expenses (excluding amortization, which is translated at the same rate as the related asset), at the average rate of exchange by quarter.

Gains or losses arising from translation of foreign currency are included in net loss for the period.

#### **(m) Income taxes**

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a future tax asset will be recovered, it provides a valuation allowance against the excess.

Additional income taxes that arise from the distribution of dividends are recognized at the same time as the liability to pay the related dividend.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Deferred tax assets and liabilities are offset when there is a legally enforceable right to the offset of current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

#### **(I) Financial Instruments**

##### **Financial assets**

The Company classifies its financial assets in the following categories: fair value through profit or loss, loans and receivables, and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at initial recognition.

##### **i. Financial assets at fair value through profit or loss**

Financial assets at fair value through profit or loss are initially recognized at fair value with changes in fair value recorded through income. Cash and cash equivalents are included in this category of financial assets.

##### **ii. Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are classified as current assets or non-current assets based on their maturity date. Loans and receivables are carried at amortized cost less any impairment. Loans and receivables comprise trade and other receivables. Amounts receivable, excluding GST, is included in this category of financial assets.

##### **iii. Available-for-sale financial assets**

Available-for-sale ("AFS") financial assets are non-derivatives that are either designated as available-for-sale or not classified in any of the other financial asset categories. Changes in the fair value of AFS financial assets are recognized as other comprehensive income and classified as a component of equity. The Company currently does not have any financial assets classified as AFS.

Management assesses the carrying value of AFS financial assets at each reporting period and any impairment charges are also recognized in other comprehensive income or loss. When financial assets classified as available-for-sale are sold, the accumulated fair value adjustments recognized in other comprehensive income are reclassified to profit and loss.

##### **Financial liabilities**

The Company's financial liabilities are classified as borrowings and other financial liabilities.

Borrowings and other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in the statement of comprehensive loss over the period to maturity using the effective interest method.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Borrowings and other financial liabilities are classified as current or non-current based on their maturity date. Accounts payable and accrued liabilities and due to related parties are included in this category of financial liabilities.

The Company does not have any derivative financial assets and liabilities as at August 31, 2013.

### **3. NEW ACCOUNTING STANDARDS AND RECENT PRONOUNCEMENTS**

#### *New accounting standards and recent pronouncements*

The following standards are effective for annual years beginning on or after January 1, 2013. The Company has assessed the impact of these standards and has determined that they would not have a material impact on the Company.

- IFRS 10, *Consolidated Financial Statements*, requires an entity to consolidate an investee when it has power over the investee, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC 12, *Consolidation – Special Purpose Entities* and parts of IAS 27, *Consolidation and Separate Financial Statements*.
- IFRS 13, *Fair Value Measurement*, aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement under IFRS. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRS.

#### *New standards, amendments and interpretations to existing standards not adopted by the Company*

The following revised standards are effective for annual periods beginning on or after January 1, 2014 with earlier application permitted. The Company has assessed the impact of these standards and has determined that they would not have a material impact on the Company.

- IAS 32, *Financial Instruments: Presentation* (January 1, 2014)
- IFRS 9, *Financial Instruments* (January 1, 2015)

There are no other IFRS or IFRIC interpretations that are not yet effective that are expected to have a material impact on the Company.

## **CORONADO RESOURCES LTD.**

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

---

### **5. EXPLORATION AND EVALUATION ASSETS (Continued)**

#### **(a) Madison Property, Montana**

In April 2005, the Company entered into an agreement to purchase a 100% interest in 7 patented and 12 unpatented mineral claims situated in Madison County, Montana. The agreement called for cash payments totaling \$300,000, share issuances, and work commitments in stages over five years. The acquisition was completed in 2010, subject to an annual payment equal to the greater of a 2% NSR or US\$50,000 (US\$50,000 paid for both fiscal years presented). During the year ended February 28, 2007, the Company acquired, by staking, eight additional contiguous claims.

The Company has extracted ore on a pre-commercial basis as a by-product of its exploration work. Accordingly, the proceeds realized on the sale of this ore have been offset against the exploration and development costs incurred.

#### **(b) True North Property, Raglan Mine District, Ungava Region, Quebec**

During the year ended February 28, 2010, the costs incurred on this property were written down to a nominal amount due to a lack of exploration activity in recent years.

#### **(c) Title to exploration and evaluation assets**

Although the Company has taken steps to verify title to exploration and evaluation assets in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and title may be affected by undetected defects.

#### **(d) Realization of assets**

The investment in and expenditures on exploration and evaluation assets comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the obtaining of permits, the satisfaction of governmental requirements and possible aboriginal claims, and the attainment of successful production from the properties or from the proceeds of their disposal.

Resource exploration and development is highly speculative and involves inherent risks. While the rewards if an ore body is discovered can be substantial, few properties that are explored are ultimately developed into producing mines. There can be no assurance that current exploration programs will result in the discovery of economically viable quantities of ore.

#### **(e) Environmental**

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions.

If the restrictions adversely affect the scope of exploration and development on the exploration and evaluation assets, the potential for production on the property may be diminished or negated. The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous material and other matters.

## CORONADO RESOURCES LTD.

Notes to the Condensed Consolidated Interim Financial Statements  
For the Six Month Period Ended August 31, 2013  
(Unaudited - Expressed in Canadian Dollars)

### 5. EXPLORATION AND EVALUATION ASSETS (Continued)

The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its exploration and evaluation asset activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

### 6. CAPITAL STOCK

#### (a) Authorized

Unlimited number of common shares without par value

#### (b) Issued and outstanding

	Number of Common Shares	Amount	Contributed Surplus
Balance, February 29, 2012	29,223,048	\$ 10,015,279	\$ 1,708,549
Issued during the period:			
Share consolidation <sup>(1)</sup>	(14,611,524)	-	-
Private placement <sup>(2)</sup>	50,000,000	6,000,000	-
Share issue costs	-	(43,228)	-
Exercise of stock options	200,000	111,440	(51,440)
Balance, February 28, 2013 and August 31, 2013 <sup>(3)</sup>	64,811,524	\$ 16,083,491	\$ 1,657,109

(1) On April 14, 2012, the Company consolidated its shares on a basis of one new for two old shares. Comparatives have been applied on a retroactive basis

(2) On August 15 2012, the Company completed a private placement of 50 million common shares at \$0.12 per share for gross proceeds of \$6 million.

(3) On September 27, 2013, the Company issued 14,461,567 common shares for the purchase of 100% of the issued common shares of Opunake Hydro Limited.

### 6. CAPITAL STOCK (Continued)

#### (c) Stock options

The Company has a stock option plan (the "Plan") allowing for the reservation of common shares issuable under the Plan to a maximum 10% of the number of issued and outstanding common shares of the Company at any given time. The term of any stock option granted under the Plan may not exceed five years and the exercise price may not be less than the discounted market price on the grant date. All options granted under the plan shall vest and become exercisable in full upon grant, except options granted to consultants performing investor relations activities, which options must vest in stages over twelve months with no more than one quarter of the options vesting in any three-month period.

The purpose of the Plan is to provide directors, officers, key employees and certain other persons who provided services to the Company and its subsidiary with an increased incentive to contribute to the future success and prosperity of the Company.

Details of the status of the Company's stock options and changes during the periods then ended are as follows:

	August 31, 2013		February 28, 2013	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding and exercisable, beginning of period	102,500	\$ 0.30	812,500	\$ 0.30
Exercised	-	-	(200,000)	0.30
Cancelled/expired	(10,000)	-	(510,000)	0.30
Outstanding and exercisable, end of period	92,500	\$ 0.30	102,500	\$ 0.30

All stock options issued vested immediately. Stock options outstanding are as follows:

Expiry Date	Exercise Price	August 31, 2013	February 28, 2013
June 7, 2014	\$ 0.30	92,500	92,500
June 23, 2014	0.30	-	10,000
Outstanding, end of period	\$ 0.30	92,500	102,500
Weighted average outstanding life of options		0.77 years	1.28 years

#### (d) Share Purchase Warrants

Details of the status of the Company's share purchase warrants and changes during the years then ended are as follows:

	August 31, 2013		February 28, 2013	
	Number of Warrants	Weighted Average Exercise Price	Number of Warrants	Weighted Average Exercise Price
Outstanding, beginning of period	2,000,000	\$ 0.36	2,000,000	\$ 0.36
Outstanding, end of period (1)	2,000,000	\$ 0.36	2,000,000	\$ 0.36

(1) warrants expired unexercised October 12, 2013

#### (e) Share-based compensation

For the period ended August 31, 2013, the Company had 92,500 stock options with a fair value of \$23,791 (Year-end February 28, 2013 – 102,500 with a fair value of \$26,931), or weighted average fair value of \$0.2572 (Year-end February 28, 2013 - \$0.2627) per option, calculated using the Black-Scholes option pricing model.

The following assumptions were used for the Black-Scholes option pricing model calculations:

Risk-free interest rate	1.4307
Expected stock price volatility	168%
Expected option life in years	3 years
Dividend rate	Nil

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate.

### 7. RELATED PARTY TRANSACTIONS

The aggregate value of transactions and outstanding balances relating to key management personnel were as follows:

	August 31, 2013		August 31, 2012	
Consulting fees	\$ 18,000	\$	17,000	\$
Consulting and engineering fees	-	\$	5,000	\$
	\$ 18,000	\$	22,000	\$

All transactions and balances are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

---

### **8. FINANCIAL INSTRUMENTS RISK**

The Company's financial instruments are exposed to the following risks:

#### *Credit Risk*

The Company's primary exposure to credit risk is the risk of illiquidity of cash and cash equivalents. The company had cash and cash equivalents amounting to \$5,837,260 at August 31, 2013 (February 28, 2013 - \$6,416,512). As the Company's policy is to limit cash holdings to instruments issued by major Canadian banks, or investments of equivalent or better quality, the credit risk is considered by management to be negligible.

#### *Liquidity Risk*

Liquidity risk is the risk that the Company will not be able to pay financial instrument liabilities as they come due. The Company's only liquidity risk from financial instruments is its need to meet operating accounts payable and related party requirements. The Company maintained sufficient cash balances to meet these needs at August 31, 2013.

#### *Foreign Exchange Risk*

The Company has foreign exchange risk due to its activities carried out in Montana, USA. At August 31, 2013 the Company had \$223,957 (February 28, 2013 - \$62,966) in current assets and \$8,032 (February 28, 2013 - \$22,739) in current liabilities originating in Montana, USA.

#### *Interest Rate Risk*

The Company is exposed to interest rate risk on its cash and cash equivalents. The majority of these deposits have been in discounted instruments with pre-determined fixed yields. Interest rate movements will affect the fair value of these instruments so the Company manages maturity dates of these instruments to match cash flow needs, enabling realization at no loss in almost all cases.

#### *Fair Value of Financial Instruments*

The fair value of the Company's financial assets and liabilities approximates the carrying amount. Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

(Unaudited - Expressed in Canadian Dollars)

### 8. FINANCIAL INSTRUMENTS RISK (Continued)

The fair value classification of the Company's financial instruments as at August 31, 2013 and February 28, 2013 are as follows:

		August 31, 2013		February 28, 2013	
	Fair Value Level	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost	Fair value through profit or loss	Loans and receivables and other financial liabilities at amortized cost
<i>Financial assets:</i>					
Cash and cash equivalents	1	\$5,837,260	\$ -	\$6,416,512	\$ -
Reclamation deposits and restricted cash		-	74,301	-	80,897
		\$5,837,260	\$ 74,301	\$6,416,512	\$ 80,897
<i>Financial liabilities:</i>					
Accounts payable and accrued liabilities		\$ -	\$ 144,631	\$ -	\$ 57,828
Loans payable		-	-	-	20,000
		\$ -	\$ 144,631	\$ -	\$ 77,828

During the six month period ended August 31, 2013 and the year ended February 28, 2013, there were no transfers between level 1, level 2 and level 3 classified assets and liabilities.

### 9. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support future business opportunities. The Company defines its capital as shareholders' equity and loans and advances payable. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company currently has revenues from the incidental sale of copper, gold and silver, but there is no long-term contract in place. As such, the Company is dependent upon external financing or the sale of assets (or an interest therein) to fund activities. In order to carry out future projects and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements.
